STRUCTURE PROJECTS AS ROAD CONSTRUCTION, DRAINAGE

MUNICIPALITY OF ROXAS, ORIENTAL MINDORO.

WHEREAS, permanent and long-lasting roads are very vital to the
economic progress of a locality, its absence redounds to
slackening of growth and development of a place;

able drainage system which will serve both as a preventive
measure to floods especially in low-lying areas during
the onset of heavy rains and likewise as a tool to main-
tain health and cleanliness of the surroundings;

a large extent, prevented, if there exists an operative
and manageable solid waste management program that is
understandable and cooperatively worked out by both the
town officials and the local constituents;

WHEREAS, roads, especially the farm to market roads, an improved
and continuous construction of drainage canals and the
implementation of a comprehensive solid waste management
program are at this point in time very essential to the
increasing demands for services and the maintenance of

WHEREAS, some 2,070 linear meters of drainage canals for an estimated amount of ₱5 M will largely promote and contribute to the safety and cleanliness of this town and will provide the constituents peace of mind and security especially those whose businesses and properties are in great danger to ensuing floods;

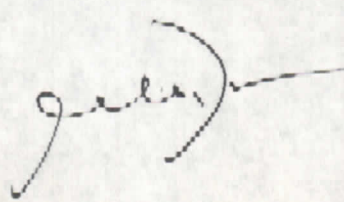

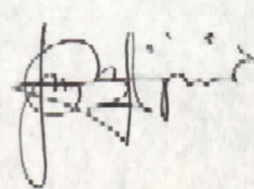

WHEREAS, solid waste management is one big problem of the national government and Roxas municipality, though with a high percentage of rural population is not an exception to the pollution problem being felt and observed in urban areas; the problem being aggravated by lack of equipment, facilities and technical know-how and abilities of the proper disposal of solid wastes such that these wastes will be converted for positive use in their natural or scientifically transformed state;

WHEREAS, the local governance of Roxas, Oriental Mindoro is unanimous in its opinion that the legislative measure passed for the regulation and control of solid wastes of this locality must be supported by sufficient and adequate facilities and equipment and technical expertise for a possible scientific process of waste management;

WHEREAS, the comprehensive solid waste management program of this municipality is slated to be a ₱2 M project and will include the purchase of a loader, garbage trucks, debris containers and other equipment deemed appropriate thereto and for skills trainings, technical and scientific know-how and information dissemination campaign vital to the instillation and internalization of values of the residents in this particular development project;
